

EARTHQUAKE ENGINEERING IN AUSTRALIA

Conference - 2005

Proceedings of a conference held by the

Australian Earthquake Engineering Society

Albury, New South Wales

2005

This work was published by the Australian Earthquake Engineering Society. The views expressed in the papers are those of the author(s) and not necessarily those of the Society.

Technical Review Committee:

Amy Heath
Assoc. Prof. Nicholas Haritos
Assoc. Prof. Priyan Mendis
Assoc. Prof. Emad Gad
Dr. Helen Goldsworthy
Dr Mark Edwards
Dr Tuan Ngo
Prof Michael Asten
Peter McBean
Emer. Prof. Paul Grundy
Vaughan Wesson
Prof. T. Balendra
Richard Weller
Dr Bill Stephenson

Russell Cuthbertson
Hugh Rutter
Prof. Bijan Samali
Cvetan Sinadinovski
David Love
Gary Gibson
Gerhard Horoschun
Prof. Hong Hao
Assoc. Prof. John Wilson
Kevin McCue
Assoc. Prof. Mike Griffith
Dr. Nelson Lam
Chi-hsiang Wang
Russell Cuthbertson

Editors: N.T.K. Lam, J.L. Wilson, B. Butler

Publisher: Australian Earthquake Engineering Society, Victoria, Australia

Cover Illustration: “*Quaternary fault scarp distribution from digital elevation model data*”

Designed by B. Butler

INVITED SPEAKERS

- **Des Bull, Technical Director, Holmes Consulting Group, New Zealand***

Earthquake engineering in regions of low-moderate seismicity.

- **John Schneider, Group Leader for Risk Research at Geoscience Australia**
Tsunami Warning System for Indian Ocean and update on Geoscience Australia's current projects.

- **Pat Jones, Emergency Management Australia**

Major Disaster Response - Canberra Bushfires Case Study.

- **Peter McBean, Director, Wallbridge & Gilbert Consulting Engineers***

Drift intolerant façade systems and flexible shear walls. Do we have a problem?.

- **Assoc. Prof. John Wilson, University of Melbourne**

New Earthquake Loading Standard, AS1170.4

- **Kevin McCue, Australian Seismology Centre***

From PSHA to Building Codes in Australia

- **Assoc. Prof. Nelson Lam, University of Melbourne***

Seismic risk modelling

- **Gary Gibson, Environmental Systems and Services**

Australian seismicity

- **Assoc. Prof. Priyan Mendis, University of Melbourne**

Introduction to Research Network for a Secure Australia (RNSA)

- **Gerhard Horoschun, ADFA, University of New South Wales***

Overview of blast engineering

- **Emeritis Prof. Paul Grundy, Monash University***

Some reflections on the structural engineering aspects of tsunami damage

- **Dr. George Walker, AON ReInsurance***

Some reflections on the insurance aspects of tsunami damage

Paul Somerville and Arben Pitarka*

Differences in Earthquake Source and Ground Motion Characteristics between Surface and Buried Faulting Earthquakes

*Paper in these proceedings

TABLE OF CONTENTS

Foreword	iv
Invited Speakers	v
	Paper No.
Discussion on required seat length of bridge girders under current Japanese design specification NAWAWI CHOUW AND HONG HAO	1
Spatial ground motion variation with site amplification effects HONG HAO AND NAWAWI CHOUW	2
Earthquake engineering in regions of low-moderate seismicity DES BULL	3
The earthquake trend in Australia indicated by LURR method CAN YIN	4
Some reflections on the insurance aspects of tsunami damage GEORGE R WALKER	5
Structural health monitoring using wireless sensor networks VAUGHAN WESSON	6
Some reflections on the structural engineering aspects of tsunami damage PAUL GRUNDY, ANGELO THURAIRAJAH, AND GEORGE WALKER	7
Analysis of dynamic response and damage of structures to simultaneous ground shock and airblast loads C. WU AND HONG HAO	8
Comparison of shear wave velocity profiles of Quaternary sediments in the Newcastle area estimated from SCPT, microtremor spectral ratios and array studies and drilling CAMILLA SORENSEN, MICHAEL W. ASTEN, TREVOR DHU AND ANDREW MCPHERSON	9
MR Damper structural control using a multi-level sliding mode controller N.M. KWOK, T.H. NGUYEN, Q.P. HA, J. LI AND B. SAMALI	10
Modelling tsunami wave force effects on structures NICHOLAS HARITOS, TUAN NGO AND PRIYAN MENDIS	11
Design of a 4 million litre elevated steel reservoir A.J. ENGLAND	12
Dynamic structural analysis of a high-rise building using simulated intra-plate earthquake: Case study for Queensland CVETAN SINADINOVSKI, MICHAEL TURNBULL AND E. JANKULOVSKI	13
3-D finite element analysis of pile-to-pile cap connections subjected to seismic action M. TEGUH, C.F. DUFFIELD, P.A. MENDIS AND G.L. HUTCHINSON	14
Earthquake Ground Motion Attenuation Relations for SWWA JACQUELINE KENNEDY, HONG HAO AND BRIAN A. GAULL	15

Finite element modelling of blind-bolted T-stub connections to CFT columns HUANG YAO, HELEN GOLDSWORTHY AND EMAD GAD	16
Meckering earthquake and the scout hall slip GEOFFREY COCKS AND ADAM WILMOT	17
The need for age dependant vulnerability models for unreinforced masonry structures NICHOLAS J. BROWN, KEN DALE, TREVOR DHU AND MARK EDWARDS	18
Spectral response of recorded and simulated strong ground motion in SW of WA CVETAN SINADINOVSKI, HONG HAO AND BRIAN GAULL	19
Anchoring blast resistant windows STEPHAN P. WARD, BILL JORDAN	20
Differences in earthquake source and ground motion characteristics between surface and buried faulting earthquakes PAUL SOMERVILLE AND A. PITARKA	21
A preliminary seismicity model for south west Western Australia based on neotectonic data DAN CLARK	22
Experimental evaluation of reduced models of large structural systems for active vibration control J. BOFFA AND N. ZHANG	23
AS 1170.4 Earthquake actions in Australia – Worked examples RICHARD WELLER	24
Response of pipelines to blast loading EMAD GAD, JOHN L. WILSON, ADRIAN J. MOORE AND ALAN B. RICHARDS	25
Blast and Terrorist Attack: The application of engineering principles to its mitigation GERHARD HOROSCHUN	26
From PSHA to Building Codes in Australia KEVIN MCCUE	27
Modelling of seismic risks based on displacement NELSON LAM	26
Modelling of distant earthquakes affecting Peninsular Malaysia and Singapore VENKATESAN SRIKANTH, NELSON LAM, T. BALENDRA AND JOHN L. WILSON	29
Displacement based models for site effects H.H. TSANG, NELSON LAM AND ADRIAN CHANDLER	30
Force-based and displacement-based modelling for non-structural components in buildings HAIDER AL ABADI, NELSON LAM AND EMAD GAD	31
Modelling shear wave velocity profiles in rock using the microtremor spatial auto-correlation technique: the Hong Kong case study H.H. TSANG, J. ROBERTS, M. ASTEN, A.M. CHANDLER, N.T.K. LAM AND L.S. CHAN	32
Displacement limits for building collapse K. RODSIN, N.T.K LAM, J.L WILSON AND H. GOLDSWORTHY	33
Out-of-plane displacement behaviour of unreinforced masonry walls from time-history analyses E. LUMANTARNA, N.T.K LAM, J. WILSON, M.GRIFFITH AND J. VACULIK	34
Drift intolerant façade systems and flexible shear walls. Do we have a problem? PETER C. MCBEAN	35

The importance of shear wave velocity information at a soil site M.W. ASTEN, N.T.K. LAM, V. SRIKANTH, H. RUTTER, AND J.L. WILSON	36
The seismic assessment of the Roman theatre at Benevento CONNIE ZHU AND HELEN GOLDSWORTHY	37
Seismic improvement of adobe-mudbrick walls – comparison between internal and external vertical reinforcement DOMINIC DOWLING, BIJAN SAMALI AND JIANCHUN LI	38
Experimental modal analysis of U-shaped adobe-mudbrick wall units BIJAN SAMALI, JIANCHUN. LI, DOMINIC DOWLING AND ULRIKE DACKERMANN	39
Cyclic response of unreinforced clay brick masonry walls J. VACULIK, M. GRIFFITH, N. LAM, J. WILSON AND E. LUMANTARNA	40
Ground-motion attenuation modeling in Australia: implications for earthquake hazard and risk TREVOR ALLEN, PHIL R. CUMMINS AND TREVOR DHU	41
Simulation-based seismic hazard assessment for South East Queensland: progress and directions DION WEATHERLEY AND ESTELLE SAEZ	42
Index of Authors	viii

Papers were, in accordance with DETYA requirements, subjected to an independent critical review process by two experts from the field in which the material was written.
